ZENERA: TURNING A SIMPLE PROBLEM INTO A STARTUP

MEGHANA R & CHETAN HOSKHANDE

ABOUT THE FOUNDERS

Chetan Hoskhande and Meghana R are the founders of Zenera, a travel-tech startup focused on making group travel easier, safer and more convenient. Chetan is a student at RNSIT and the author of REGARDLESS: How to Rise When Nothing is in Your Favor. He believes in solving real-life problems and simplifying complicated experiences. Meghana R serves as the CO Founder and Tech Lead, contributing her technical expertise to building the platform.

THE INSPIRATION BEHIND ZENERA

This moment made him realise that group travel involves more than finding transportation. Travellers often face safety concerns, unclear pricing, limited flexibility and difficulties coordinating their plans. The problem stayed with him, inspiring him to explore a better solution. After studying the business model and possibilities, Chetan and Meghana decided to work towards creating a platform that could make group travel simpler and more reliable.

His inspiration came from a deeper desire to create better experiences for people. He believes that travel should be about enjoying the journey rather than worrying about arrangements. The question about knowing the driver became a guiding principle for the startup, representing the importance of trust, safety, coordination and peace of mind. Meghana believed in the idea and joined him in building the solution.

ZENERA: TURNING A SIMPLE PROBLEM INTO A STARTUP

About Zenera

Zenera was officially founded on 25 February 2026 with the aim of transforming the group outstation travel experience. The platform brings together services such as vehicle booking, travel packages, AI-based trip planning, multi-city itinerary planning, transparent pricing, cost-splitting, real-time tracking and safety verification.

Zenera primarily targets college students, friend groups, hostel groups, student organisations and corporate teams. It also aims to serve pilgrimage travellers and other groups looking for convenient transportation. Its technology includes route optimisation and driver-group matching to improve reliability and coordination.

The startup has already tested its beta application on more than 50 devices, while over 100 drivers across different vehicle categories have expressed interest in joining the platform. Zenera has a five-member team working across technology,website development,business,design and marketing.

Initially focusing on Bangalore, the startup plans to expand to Mysore, Hyderabad, Mumbai and other major cities. Its future vision is to become a leading platform for group travel in India,while exploring opportunities in corporate travel and travel-package listings.

For Chetan and Meghana, Zenera represents the belief that meaningful businesses can begin by noticing everyday problems and finding practical ways to solve them. Their goal is to make group travel affordable, safe, flexible and stress-free, allowing travellers to spend less time managing arrangements and more time enjoying their journeys.

Zenera follows a commission-plus-platform-fee revenue model, while its major operating costs include product development, employee salaries, driver and user acquisition, and server or cloud services. Transportation partners and payment gateways are important to its planned operations.

Ultimately, Zenera's vision is to become a default platform for group travel in India. By combining technology with a focus on trust and customer convenience, the founders aim to help travellers spend less time managing logistics and more time enjoying their journeys.

My journey at RNSIT has been a memorable and enriching experience. The MCA Department has played a significant role in shaping my technical knowledge and professional skills. The practical learning opportunities, supportive faculty, and continuous guidance helped me develop confidence and prepare for the challenges of the corporate world. The placement training and encouragement throughout my journey have been instrumental in achieving this milestone. I sincerely thank the faculty and the MCA Department for their constant support and guidance.

Thank you, RNSIT!
For shaping my future

DEPARTMENTAL ACTIVITIES:

Online Event conducted for third semester CSE(AI & ML) students

Online Podcast conducted for 7th semester CSE(AI & ML) students.

VIDYOUTH 2026

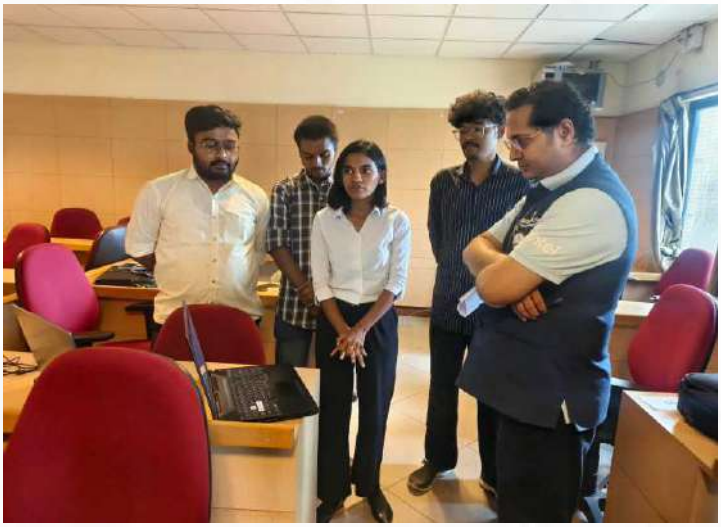
EEE Department Fest "Vidyouth 2026 was conducted on September 25th and 26th.

PROJECT OPEN HOUSE

EEE Department Project Open House was conducted on 19th of October.

ECE DEPT ACTIVITIES :

SILICONS - 2026



Silicons 26, a National Level VLSI Design and Embedded Systems Project expo was conducted by the Department of ECE on 24th of October 2026. More than 60 batches across different parts of the state and country participated in this mega event.

TECHNICAL EXCELLENCE WORKSHOP :

OUTCOMES OF THE SESSION – INDUSTRY-READY TECHNICAL EXCELLENCE WORKSHOP

- Students enhanced their problem-solving abilities and logical thinking skills through practical exercises and industry-oriented activities.
- Students gained hands-on exposure to coding practices and improved their ability to present technical concepts and solutions effectively.
- Students developed skills in project planning, implementation, and discussion, with an emphasis on addressing real-world problems.
- Students improved their technical communication, presentation, and teamwork skills through project discussions and presentations.
- Students gained confidence in demonstrating their technical knowledge through project presentations and final assessments.
- The workshop provided students with valuable insights into industry expectations and helped bridge the gap between academic learning and practical industry requirements.

CAREER GUIDANCE :

On September 29, 2026, the Department of Civil Engineering at RNS Institute of Technology (RNSIT) organized an interactive placement guidance session for 7th-semester students, led by Prof. Mahadeva M, Assistant Professor and Department Faculty Placement Coordinator. Addressing the final-year cohort, Prof. Mahadeva emphasized the critical role of campus placements and internships in bridging academic learning with professional industry requirements. The session featured comprehensive briefings on corporate career paths, core engineering roles, and upcoming placement opportunities with firms like M/s Valuacion India Inc., empowering students to step into the professional world with technical confidence and career readiness.

On October 29, 2026, the Department of Civil Engineering at RNS Institute of Technology (RNSIT) conducted an unplaced student placement awareness and career guidance session for 7th-semester students. Led by Satish Kumar S and Prof. Mahadeva M (Assistant Professor & Department Faculty Placement Coordinator), the session addressed unplaced final-year students on the strategic importance of seizing early core civil placement opportunities, maintaining momentum during campus recruitment drives, and building industry-ready technical skill sets to secure successful engineering roles.

UPCOMING OPPORTUNITIES

- Campus recruitment drives: 31+ campus drives are planned for the upcoming placement season.
- Internship opportunities :
- Training programmes: Aptitude, technical, coding, and soft-skills training programmes will be conducted to enhance employability.
- Certification programmes: (IBM Skill Build Program) Industry-recognized certification programmes in emerging technologies will be organized.
- Career guidance initiatives: Career counselling sessions, resume-building workshops, mock interviews, and expert talks will be arranged to support students' career development.
