

TATVA is the newsletter of Electronics and Instrumentation Engineering (EIE) Department. This annual newsletter emphasizes Instrumentation to the stakeholders. An editorial team of students (generally third year students) and an advisory team of staff are formulated every year. These literary teams take the responsibility in bringing out the newsletter. The newsletter is distributed to all RNSIT students & faculty.

TATVA brings out the hidden talents, ideas and innovations of the students. It is a means to enhance the horizon of students' knowledge in various fields of technologies. It also brings out the various talents of the students in the fields of art, literature and poetry. Every year the theme of the letter is changed in order to spark interest in the minds of young budding engineers.

Table below shows the front page of TATVA for the past ten publications.
