Did You Know?

India's Hidden Employment Engine

India is no longer just the world's outsourcing destination—it's becoming the global innovation hub for multinational companies. Today, India hosts over **1,800 Global Capability Centres (GCCs)**, with global companies choosing India for innovation, R&D, AI and digital transformation—not just back-office operations.

What GCCs Do Today

 Build Global Products
  Develop AI Solutions
  Drive R&D & Innovation
  Strengthen Cybersecurity
  Enable Digital Transformation

By 2030, India could have **2,500+ GCCs**, employing **4.5–5 million** professionals and contributing significantly to the country's economy.

Career Opportunities for Graduates

Engineering | Data Science | Cybersecurity | Finance
Product Management | Cloud Computing | Design | Supply Chain Analytics

GCCs in India

Global Companies with GCCs in India

 Microsoft
  JPMorgan Chase
  Walmart

 Mercedes-Benz
  Goldman Sachs
  Shell

Global Talent. Real Impact.

INNOVATION
COLLABORATION
GLOBAL IMPACT

For today's graduates, GCCs represent one of the fastest-growing pathways to build a **global career** while working from India.

India's Hidden Employment Engine:

India is no longer just the world's outsourcing destination—it's becoming the global innovation hub for multinational companies. Today, India hosts over 1,800 Global Capability Centres (GCCs) operated by leading organizations such as Microsoft, JPMorgan Chase, Walmart, Mercedes-Benz, Goldman Sachs, and Shell. These centres are no longer focused on back-office support; they are designing global products, developing AI solutions, conducting cutting-edge R&D, filing patents, and driving digital transformation for businesses worldwide. Industry experts project that India could have over 2,500 GCCs by 2030, employing 4.5–5 million professionals and contributing significantly to the country's economy. The demand for talent is expanding beyond software engineering to include AI, data science, cybersecurity, cloud computing, finance, product management, design, and supply chain analytics. For today's graduates, GCCs represent one of the fastest-growing pathways to build a global career while working from India.

The Next Global Product You Use Could Be Built in India:

Many of the digital products and features used by millions around the world are now being designed, engineered, and tested in India's Global Capability Centres (GCCs). What began as support centres have evolved into strategic innovation hubs where global companies develop AI-powered solutions, cybersecurity platforms, cloud technologies, and next-generation products. With more multinational companies expanding their GCC operations in India each year, these centres are becoming one of the country's biggest creators of high-value jobs. For students, this means exciting opportunities to work on global projects, collaborate with international teams, and build world-class careers—all without leaving India.

EXPERT TALK : CAREER OPPORTUNITIES IN THE EVOLVING IT INDUSTRY

RNS INSTITUTE OF TECHNOLOGY
Autonomous Institution Affiliated to VTU

DEPARTMENT OF MCA
Expert Talk on

Career Opportunities in the Evolving IT Industry
For III Semester MCA Students

Mr. Shashank H
Cloud and Infra Engineer
LTIMindtree (LTI)

9:30 AM
29 AUGUST 2026
HI-TECH LAB, FIRST FLOOR IT BLOCK

LTIMindtree

Vision of the Department: Synergizing Computer Applications for the Real World.

www.mca.ac.in

Outcomes of the Session – Career Opportunities in the Evolving IT Industry

- Students gained awareness of emerging career opportunities and job roles in the IT industry.
- Students understood the importance of upskilling and learning emerging technologies for career growth.
- Students gained insights into industry expectations, required technical skills, and employability skills.
- Students understood the importance of internships, certifications, projects, and practical experience for placements.

Students were motivated to plan their career paths and prepare effectively for future placement opportunities.

INDUSTRIAL VISITS

M/S MICROSOFT

Date: 26th August 2026 | Dept & Batch : BE & MCA | No. of Students : 30

On August 26, 2026, BE & MCA students of RNS Institute of Technology visited the Microsoft Campus as part of an industry visit organized by the Career Development Cell in association with M/s Seventh Sense. The visit provided students with valuable exposure to the corporate environment, industry practices, emerging technologies, and the professional ecosystem at Microsoft. Students gained insights into real-world applications of technology and the skills expected in the industry. The interaction and campus experience encouraged students to explore new career possibilities, understand industry expectations, and strengthen their professional outlook. Overall, the visit was an enriching and inspiring experience that enhanced students' industry awareness, technical perspective, and career readiness.

CDC EVENT : cognizant

Cognizant | Nurture Partner Network (NPN)
Cybersecurity 2027

This program has been thoughtfully designed as an exclusive opportunity for candidates selected through our 2027 campus hiring. It enables high potential students to begin their careers in the role of Ace – Full Stack AI Engineer, at the Associate or Senior Associate level, while gaining early exposure to advanced technologies and next generation digital solutions.

This hackathon will provide candidates with a hands-on opportunity to solve real-world business challenges, develop innovative solutions and present their ideas to the panel.

MOCK INTERVIEWS: CONDUCTED BY THE DEPARTMENT DFPC'S WITH ASSISTANCE FROM ALUMNUS.

Resume review sessions: Conducted as part of Mock Interviews.

PLACEMENT DRIVE

Students attended Placement Drive conducted by M/s NKRF Product & Services conducted on 18th August 2026.

Students Attending Pod-ai employability assessment test conducted on 28th August 2026.

TECH TITANS TALK :

The Career Development Cell initiated “Tech Titans Talk,” a monthly industry-interaction series for the 2027 batch, aimed at enhancing students' technical awareness, industry exposure, and professional development.

The first session was conducted on 31 July 2026 with Mr. Subhabrata Pal, Director & Consulting Expert at CGI. The session focused on “The Future of ECE & EEE in the Digital Era”, covering emerging areas such as AI, IoT, Embedded Systems, Smart Manufacturing, Automotive Electronics, 5G, and the Semiconductor Industry.

Mr. Pal also highlighted the key skills expected by industry, including technical expertise, certifications, problem-solving, communication, projects, and internships. Students received valuable guidance on resume building, interview preparation, aptitude and technical expectations, and career planning, making the session an insightful step towards industry readiness.
